

CHAMOIS TECHNOLOGY

All PEARL iZUMi chamois are designed in-house and custom manufactured by our long-term partners in Italy. We've used pressure mapping technology to understand where riders need support, and just as importantly, where we can remove unnecessary padding to reduce bulk. Then we sought the best materials and developed new construction methods, before extensively evaluating each prototype with our team of wear-testers.

We design with three goals in mind:

1 Reduce Friction

Cycling is repetitive, so we use high stretch materials, soft face fabrics, and innovative multi-layer construction to address the movement between your body and saddle.

2 Provide Support

A considerable amount of weight is concentrated on the rider's sit bones. Our high-density materials provide support and spread the pressure over a wider area for more comfort.

3 Keep Skin Dry

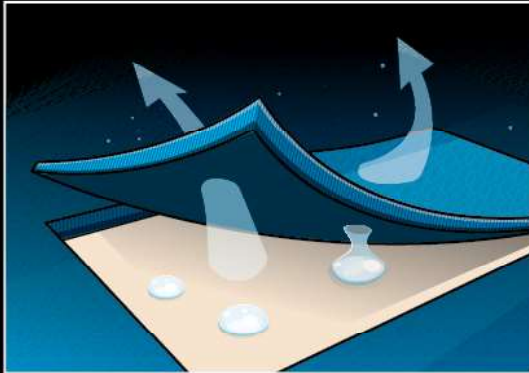

Special highly breathable foam layers are combined using flame bonding to avoid pore-clogging adhesives. This allows moisture to move uninterrupted away from your body, helping to maintain skin health and a chafe-free riding experience.

	MEN'S	WOMEN'S
PRO Escape 1:1® Chamois Our best chamois, featuring a high-density 3-layer suspension core and independent ultra-soft next-to-skin layer, provides plush support even on the longest rides.		
ELITE Escape 1:1® Chamois This premium chamois features a high-density 2-layer suspension core and independent next-to-skin layer, for reliable long-ride supportive comfort.		
SELECT Escape 1:1® Chamois A quality chamois designed with an emphasis on next-to-skin comfort and breathability, featuring medium-density support.		

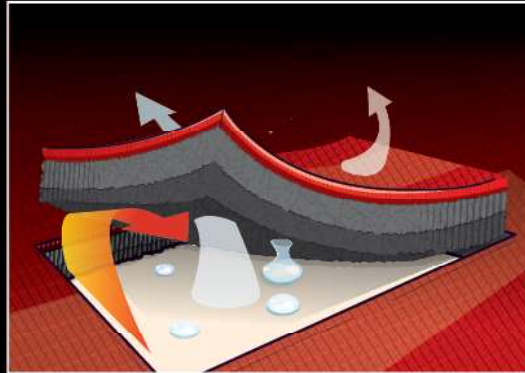

THINKING WOVEN IN, NOT ADDED ON.

Our technical fabrics are engineered to work together as a system to keep you comfortable in any conditions.

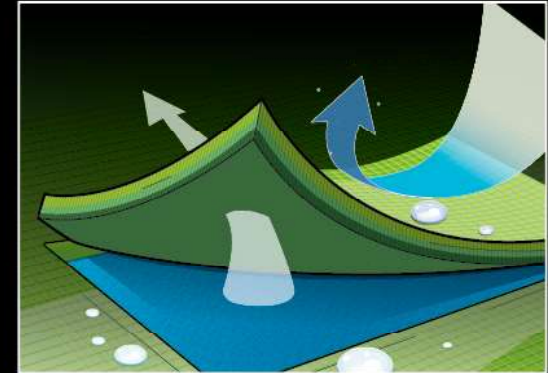

TRANSFER

Transfer fabrics move perspiration away from your body for fast evaporation to keep you dry.

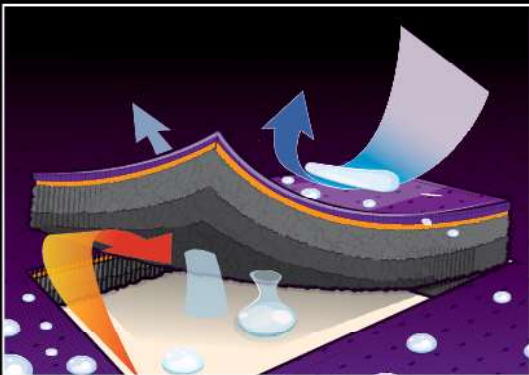

THERMAL

Designed to dry fast and retain the right amount of body heat to keep you comfortably warm.

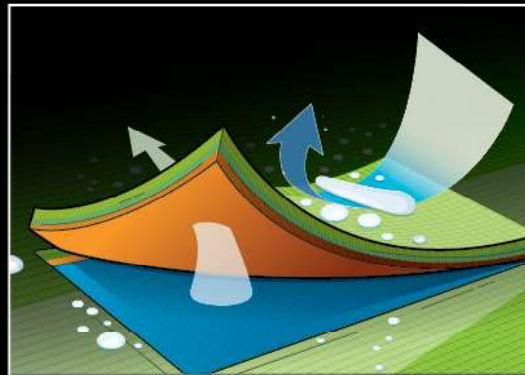

BARRIER

Highly breathable wind protection with water repellency.

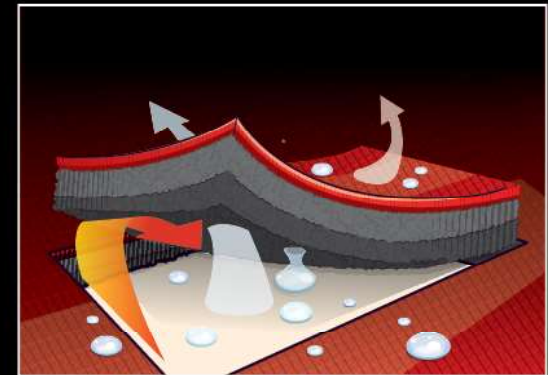

AmFIB[®]

Softshell technology for warmth, plus breathable protection from wind and water.

WxB

Waterproof breathable fabric and taped seams for total protection from wind and rain.

PI DRY[®]

PI Dry[®] transforms knit and woven garments to shed water, without compromising warmth, wicking performance or fabric feel.
