

COMFORTABLY TACKLE ANY ADVENTURE

Cold weather cycling can mean biting winds, chilling precipitation, and fewer hours of daylight. It can also mean quieter roads, different scenery, and thrilling new challenges. With the right kit, you can adapt to your surroundings and comfortably put longer hours in the saddle no matter the weather. Reimagine what cold weather riding can be with high-performance Evolve wear that comfortably insulates and protects you throughout your ride.

LONG-LASTING COMFORT & PROTECTION

Evolve's body-mirroring anatomic cuts and strategic material placement seamlessly fuse elegant styling with efficient multi-layered weather protection for comfortable long-distance riding.

PACK IT ALL

Ample pocket storage ensures you'll be ready for anything by keeping added warmth and protection within reach. Start your ride with the optimal combination of gear and store lightweight, low-bulk outer layers and accessories in case things change.

WATER-REPELLENT & WARM

Wet is wet, it doesn't matter if it's from rain or sweat. Evolve gear is constructed with breathable, lightweight, windproof, and water-repellent materials to keep riders comfortably performing in the 37°C zone.

RIDE SAFE. RIDE SEEN.

The longer and more often you ride, the more noticeable you need to be. Evolve has highly reflective fabrics and elements to improve low-light visibility from multiple angles.

BRING THE HEAT

From dewy dawns to frigid afternoons, cold weather riding is a continuum of layering challenges. It takes some personal experimenting to find what works best for your body in each situation. Evolve's versatile lineup of lightweight, breathable, and protective gear keeps you at the optimal temperature all season long.

15°C

On milder rides, start with a breathable base layer and add the Evolve Jersey and Bib shorts for a solid foundation. Pack away the Warm Wind Vest and warmers to help you adjust your temp on the road. Insulate your hands and feet with the moderate warmth of our Early Winter Gloves and toe covers.

SLEEVELESS MESH BASE LAYER, EVOLVE WARM VEST, SHIMANO EVOLVE JERSEY, SHIMANO EVOLVE BIB SHORTS, VERTEX ARM WARMER, VERTEX LEG WARMER

10°C

You can choose warmer thermal layers on colder rides and add the Evolve Warm Wind vest for extra warmth. Combining layers will provide breathable insulation and block windchill on windy days or long descents. Keep your extremities covered with shoe covers, INFINIUM™ Race Gloves, and our new Original Wool blended Socks.

VERTEX SHORT SLEEVES BASE LAYER, EVOLVE WARM VEST, VERTEX THERMAL LONG SLEEVE JERSEY, EVOLVE LIGHT THERMAL BIB TIGHTS

5°C

If the temps dip into the single digits, swap in a windproof jersey that can be zipped down to vent excess heat after riding hard or if graced by the sun's warmth. You can also adjust your kit and pack away what you don't need into one of the many back pockets of the Evolve Wind Jersey.

VERTEX SHORT SLEEVES BASE LAYER, EVOLVE WIND JERSEY INSULATED, EVOLVE LIGHT THERMAL BIB TIGHTS

0°C

Zero-degree days don't automatically mean indoor training. A combo of a baselayer, Thermal LS Jersey, and outer layers with a DWR treatment can keep the wind's bite off your body. Finish off this protective kit with INFINIUM™ PRIMALOFT® GLOVES and Thermal Shoe covers to keep your digits warm and happy.

VERTEX SHORT SLEEVES BASE LAYER, EVOLVE WIND JERSEY INSULATED, VERTEX THERMAL LONG SLEEVE JERSEY, BEAUFORT BIB TIGHTS

-10°C

If the day ahead looks brutal, layer more extensively by pairing the Evolve Warm Vest with the Evolve Wind Jacket. These two pieces were designed to be worn as a set or separately depending on the conditions. With an abundance of pocket storage, you can swap between both and still have plenty of room for your phone and other vital items.

VERTEX LONG SLEEVES BASE LAYER, EVOLVE WARM VEST, EVOLVE WIND JERSEY INSULATED, BEAUFORT BIB TIGHTS

VERSATILE JERSEY WITH PLENTIFUL STORAGE AND PROTECTION.

Be ready for anything with six pockets that can store all you need to stay comfortable on long rides in low-viz conditions.

DWR treated windproof front protects against wind and light rain while its brushed back breathes. Wear alone or paired with the Evolve Warm Vest when the temperature drops.

Wind Jersey**

BRING IT ALL

Ample storage with three back pockets, two waterproof inner pockets, and dual mesh side panel pockets.

WARMTH BY DESIGN

Layered construction creates a pocket of warm air between the soft brushed interior and weather-repellent outer.

PROTECT YOUR NECK

Raised windproof neck material insulates and blocks windchill.

BALANCED PROTECTION

DWR treated windproof front protects while its brushed back comfortably breathes.

MADE TO LAYER

Wear alone or paired with the Evolve Warm Vest when the temperature drops.

BE SAFE. BE SEEN.

Multiple reflective elements raise visibility in low-light conditions.

YOUR GO-TO COMPANION FOR LONG RIDES IN LOW VIZ CONDITIONS.

Ultra-lightweight vest with strategically layered construction creates a pocket of warm air between the soft brushed interior and DWR weather-repellent outer.

Wear alone or paired with the Evolve Wind Jacket when the temperature drops.

**Evolve
Warm Vest**

ANATOMICAL AND WATER-REPELLENT LIGHT THERMAL BIB TIGHTS.

These DWR-treated anatomical light thermal bib tights maintain comfort on long, cold, and damp rides with highly breathable materials and durable splash/light rain protection.

Evolve
Light Thermal Bib Tights

MULTI-LAYERED PROTECTION

Windproof front panels block the cold, and durable water-repellent fabric repels rain, road spray, and splashes—even after multiple washings.

BREATHABLE PROTECTION

Thermo-regulating material with DWR (Durable Water-Repellent) treatment protects without adding bulk or overheating.

ANATOMIC COMFORT

Anatomical cut with flat stitching creates a comfortable second skin fit that doesn't bunch up or hinder pedaling.

LOW-LIGHT VISIBILITY

Reflective vertical stripes on calves improve low-light visibility.

INTEGRATED DESIGN

Zipper-free ankles layer easily and comfortably with shoe covers.
